Summary

- Full-stack web developer , Linux DevOps
- Highly experienced building single page web applications using Django, React & Flux
- Build complex things from simple things. Create automation things from manual things.
- I am a Linux user. Build, run and deploy on Linux. Dockerize everything, automation build via Circle CI. Do less, earn more.
- #python #nodejs #linux #cloud #aws #heroku #django #flask #expressjs #reactjs #keras #tensorflow #docker #circleci #ecs #s3 #route53 #rds #slack #bitbucket #trello #confluence
- My entire job is turn complicated things to simply things.
- Self-learn and build application from #Flutter in 1 weeks and Atom plugin in 1 day.
- And I'm always trying simplify everything everyday
